## 2 PROJECT BACKGROUND

Bureau of Energy Efficiency (BEE), a statutory body under Ministry of Power, Government of India, in collaboration with United Nations Industrial Development Organization (UNIDO) is executing a Global Environment Facility (GEF) funded national project “Promoting energy efficiency and renewable energy in selected MSME clusters in India”.

The overall aim of the project is to develop and promote a market environment for introducing energy efficiency and enhanced use of renewable energy technologies in process applications in 12 selected energy-intensive MSME clusters across 5 sectors in India. This will enable improvement in the productivity and competitiveness of units, as well as reduce overall carbon emissions and improve the local environment.

The details of the sectors and clusters identified is as below

Table 1 : List of clusters identified

Sector	Cluster
<b>Brass</b>	Jamnagar, Gujarat
<b>Ceramics</b>	Khurja, Uttar Pradesh
	Morbi, Gujarat
	Thangadh, Gujarat
<b>Dairy</b>	Gujarat
	Kerala
	Sikkim
<b>Foundry</b>	Belgaum, Karnataka
	Coimbatore, Tamil Nadu
	Indore, Madhya Pradesh
<b>Hand tools</b>	Jalandhar, Punjab
	Nagaur, Rajasthan

Confederation of Indian Industry – CII Sohrabji Godrej Green Business Centre has been engaged by Bureau of Energy Efficiency to carry out the assignment on “Capacity building of Local service providers (LSP’s) under GEF-UNIDO-BEE project “**Promoting Energy Efficiency and Renewable Energy in selected MSME clusters in India**” for the Jalandhar hand tools cluster.

## 3 CLUSTER SCENARIO

### 3.1 HAND TOOL CLUSTER JALANDHAR

Hand tools are predominately produced in the small-scale sector in India. Jalandhar, in Punjab is one of the prominent hand tools clusters in the country. <sup>1</sup>The cluster came into existence around the time of Indian independence in 1947, when skilled laborers from Pakistan came and settled there and started manufacturing hand tools. Subsequently, the government of Punjab through Punjab State Industrial Development Corporation (PSIDC) set up an industrial estate on the outskirts of city which is today a hub of hand tools. A substantial quantity of the hand tools production is exported to countries like USA, UK, Germany, Italy, Australia and Russia.

There are around 950 units manufacturing hand tools in the cluster. Out of this, about 900 are in the micro and small-scale units and 50 units are in the medium scale. <sup>2</sup> As per industry estimates, the cluster produces about 50,000 tons of hand tools per annum. Most of the units manufacture an array of hand tools like spanners, screw driver, pliers, bench vices, tire levers and hammers. A medium scale unit produces around 50-70 tons of material per month. The production of the unit depends upon the number of hammers installed in the unit. The production of the clusters is presently affected because of frequent power cuts, ranging from 4-6 hours in a day. The estimated turnover of the cluster is approximately Rs 1,000 crores (Rs 10 billion) per annum. The cluster employs about 60,000 direct employees.

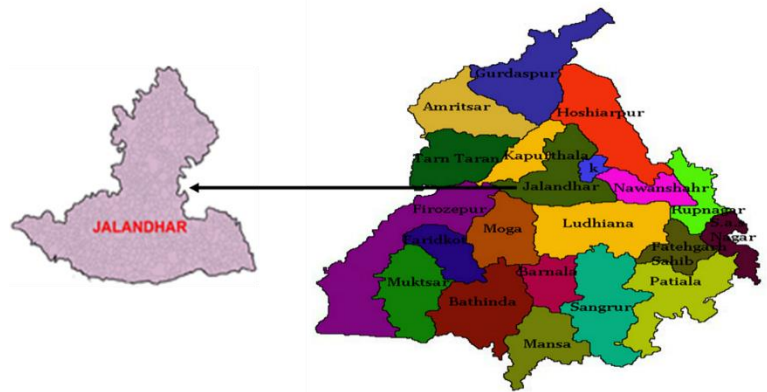

Figure 1: Jalandhar Hand Tool Cluster

<sup>1</sup> As per previous study done by UNIDO  
(<http://sameeksha.org/pdf/clusterprofile/JalandharHandToolsClusterBrief.pdf>)

<sup>2</sup> As per previous study done by TERI  
(<http://sameeksha.org/pdf/clusterprofile/JalandharHandToolsClusterBrief.pdf>)

### 3.2 The major products manufactured in Jalandhar Hand Tool cluster:

All kind of hand tools are manufactured in Jalandhar like Hand tools like hammers, hand saws, screw drivers, wrenches, chisels, scrapers, wire-strippers, hand drills, pliers, vises, spanners, file.

Figure 2: Pictures of Hand Tool Products

### 3.3 Type of operations in Hand tool Cluster

Hand tool units in Jalandhar cluster are majorly engaged in three different types of operations typical forging, hardening and baking process to manufacture hand tools. The typical production process used to manufacture hand tools includes the following:

- Raw material cutting using power presses
- Heating in oil fired forging furnace
- Forging using drop hammer
- Blanking using power press
- Hardening – heating to 835 °o. (oil fired furnace) followed by quenching
- Tempering (electrical operated furnace)
- Shot blasting
- Electroplating (if applicable)
- Packing, inspection & dispatch

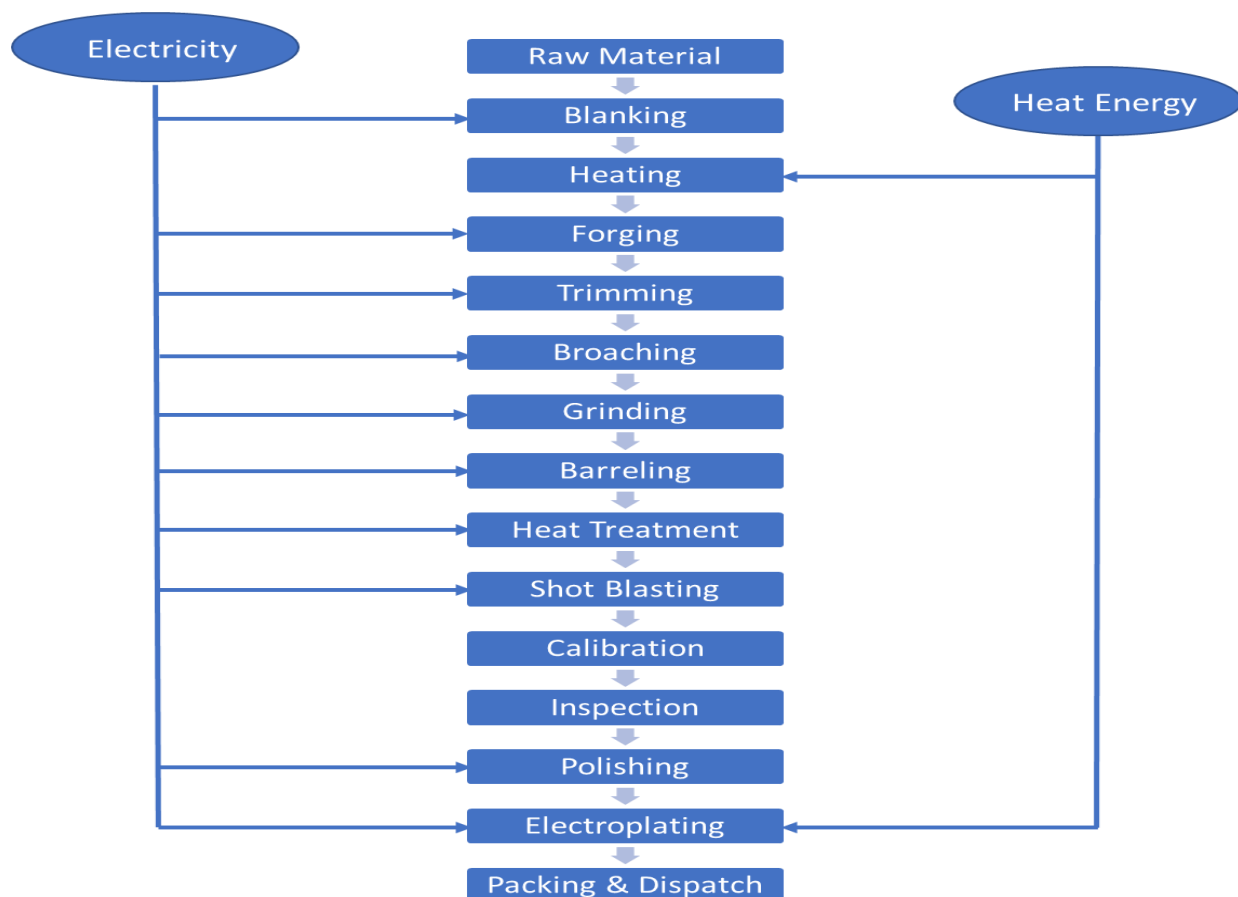

Figure 3: Major Operations in Hand Tool Units

## 4 MAPPING OF LOCAL SERVICE PROVIDERS

### 4.1 LSPs Operation in Jalandhar Hand Tool Cluster and their influence on Energy Efficiency

Local Service Providers are instrumental in influencing MSME industries' journey of sustained growth. LSP can be a firm or an individual providing the services to the units in order to run their operation smoothly and effectively. The services provided by the LSP can be a consultancy services, operation, repair & maintenance services, new installation and commissioning services. These services have a significant role in energy consumption of equipment as they are major energy guzzlers and most of the energy cost of industries is due to these equipment & utilities. So LSPs should have better knowledge in terms of best industrial practices for energy use optimization and applications of renewable energy technologies. A well trained LSP will perform the job efficiently that would help industry to reduce their cost and increase competitiveness. Equipment life will also increase without degrading the quality of the product.

In Jalandhar hand tool cluster most of the units are mainly dependent upon Original Equipment Manufacturers (OEMs) for the services of equipment's like hammers, induction furnaces, cooling towers etc. Most of these OEM's are local manufacturer they have offices in different parts of Punjab, as a result they are easily accessible by the hand tool units. In addition to this in a typical hand tool unit most of the repair and maintenance activities are done by in-house technicians and maintenance operators. The LSPs can be categorized as follows: -

- All major OEMS directly provide services to hand tool units which
- OEMS who provide service to the units through sub vendors
- Local technicians and operators who do the repair and maintenance activities

## 4.2 Objective of Mapping

The objective of the mapping is to identify the LSPs based on the demand and supply needs of hand tool units against available local service providers in the cluster and nearest locations. The LSPs were identified based on the major process and operations involved in the hand tool units. The figure below shows the process wise mapping of LSPs in a hand tool unit

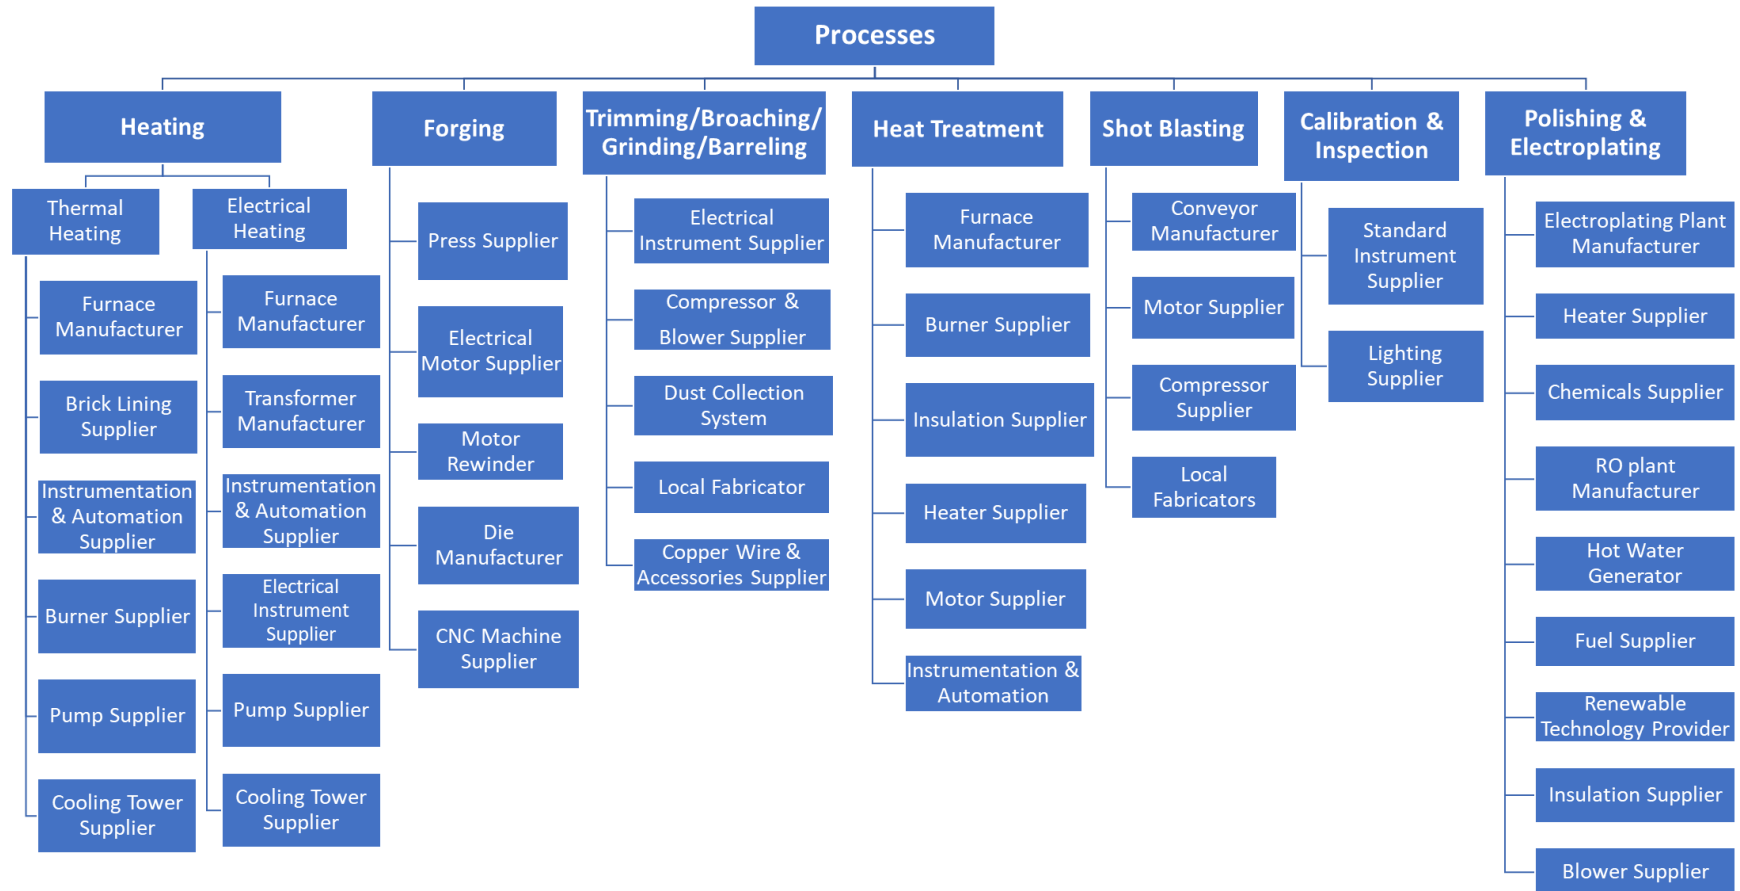

Figure 4: LSP Mapping as per process requirements

A two-tier approach is adopted here for mapping the LSPs: -

- Tier 1 Category (Major OEMS): It includes the major OEMs and service providers in the cluster, viz. Rattan Hammers, NKH Hammers, Electrotherm India Ltd and Ingersoll Rand etc.
- Tier 2 Category (Service and maintenance people): It includes local equipment manufacturers, fabricators, technicians etc., who do the repair and maintenance activities.

Only the Tier 1 category benefit from international linkages and global OEM contracts based on their capabilities. Currently all the LSP’s which are falling in the Tier 2 category are not updated with the recent technological developments and best operating practices as their exposure to global market and R&D is limited.

The major reasons for this are

- Lack of operational competitiveness
- Huge gap on the existing skill set of employees
- Poor sustainable market linkage and gap in supply chain
- Competition from others providing same technology/service
- Lack of awareness of the latest technologies on EE/RE

The main purpose of mapping is to create a data base for the existing LSPs in the cluster, to do a gap analysis in terms of technology and skills and to identify for newer LSPs.

A typical mapping process adopted in Jalandhar Hand Tool Cluster is shown below

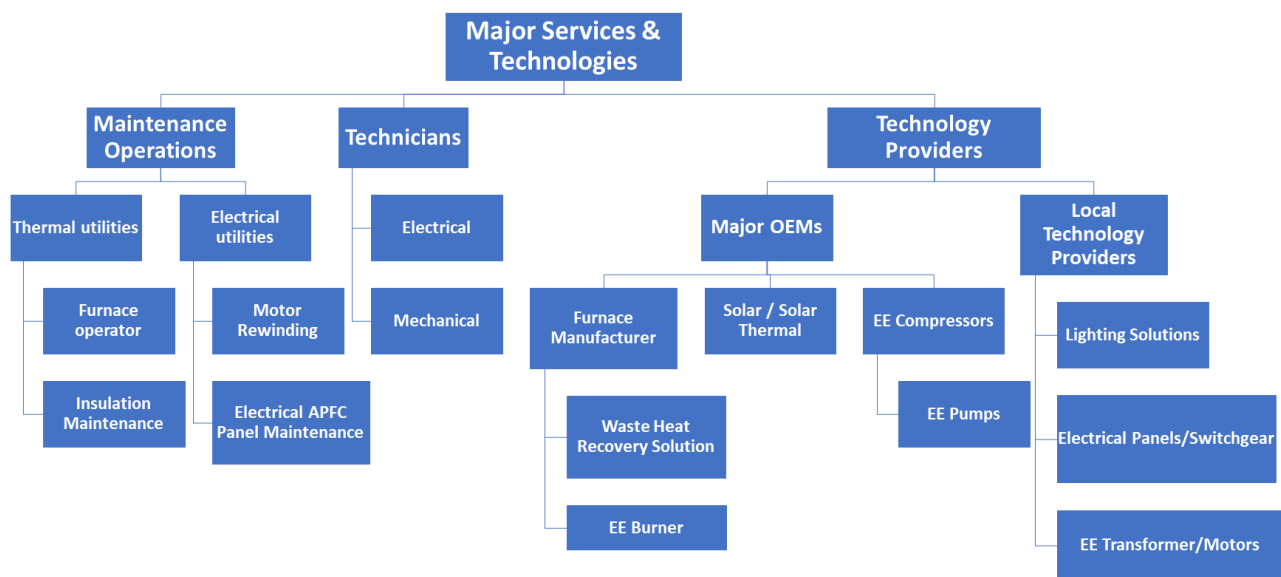

Figure 5: Mapping Tree of LSPs

### 4.3 Role of LSPs in Jalandhar Hand Tool Cluster

Table 2: Role of LSPs

	Category List	Role of LSPs	List of LSPs*
<b>Plant Level</b>	Energy Audit Agencies	Conduct energy efficiency studies and recommend ECON measures	<ul style="list-style-type: none"> <li>• Energy Audit Services, Faridabad</li> <li>• Confederation of Indian Industry</li> </ul>
	Plant Designers	Provide project management services to design and build up which include fabrications, erection of plant, equipments etc	<ul style="list-style-type: none"> <li>• Delta Energy Nature</li> <li>• Gaurav Electricals</li> <li>• Tasminder Singh</li> <li>• Pritam Singh</li> </ul>
<b>Process Level</b>	Heating, forging, heat treatment, manufacturing, Electroplating	Provides complete process solutions which govern the quality of products manufactured which includes automation, process loop modification	<ul style="list-style-type: none"> <li>• Ananta International</li> <li>• A K Goswami</li> <li>• Baljit Singh Ubhi</li> <li>• Electrotherm India Ltd</li> <li>• Rattan Hammers</li> <li>• NKH Hammers</li> </ul>
<b>Equipment Level</b>	Electrical Utilities <ul style="list-style-type: none"> <li>• Compressor</li> <li>• Pumps</li> <li>• Fans &amp; Blowers</li> <li>• Motors</li> <li>• Electrical Heaters</li> <li>• Solar PV</li> </ul>	Provide regular repair & maintenance service of equipments, health check up, introducing new energy efficient technologies to cluster with respect to equipment.	<ul style="list-style-type: none"> <li>• Bajaj Electrical Industries</li> <li>• Bhatia Electrical Stores Pvt Ltd</li> <li>• Kumra Sons</li> <li>• Global Trading Engineers</li> <li>• J S Engineers</li> <li>• National Agencies</li> <li>• H C Jain Sales (India)</li> <li>• Bocki Compressors</li> <li>• Gaurav Electricals</li> </ul>
	Thermal Utilities <ul style="list-style-type: none"> <li>• Furnaces</li> <li>• Boiler</li> <li>• Insulation</li> <li>• Burners</li> <li>• Heat Exchanger</li> <li>• Solar Water Heating</li> </ul>	Provide regular repair & maintenance service of equipments, health check up, introducing new energy efficient technologies to cluster with respect to equipment	<ul style="list-style-type: none"> <li>• Choudhary Steel Traders</li> <li>• Electrotherm India Ltd</li> <li>• Baljit Singh Ubhi</li> <li>• Shanti India</li> <li>• Delta Energy Nature</li> </ul>
<b>Operator Level</b>	<ul style="list-style-type: none"> <li>• Welding</li> <li>• Fabrication</li> </ul>	To provide basic engineering services like welding, fabrication, fitting etc with respect to equipment and sub equipments like tanks, brick lining, pipelines etc.	<ul style="list-style-type: none"> <li>• Pritam Singh &amp; Sons</li> <li>• Jasminder Singh</li> <li>• T K Engineering Works</li> </ul>
<b>*Detailed list given in Annexure 3</b>			

## 4.4 Approach and Methodology

Local service providers for the units in Jalandhar hand tool cluster are majorly comprise of maintenance operators, technicians, fabricators, energy auditors, engineering consultants, plant design engineers and other people who frequently provide their services small repairs and maintenances.

We are adopted following approaches to collect the information and understand the need and requirements of local service providers:

### **1. Inception meeting with President of “Hand Tools Manufacturers Association”**

We had conducted an inception meeting at Jalandhar Hand Tool Manufacturers Association on 29<sup>th</sup> September 2017 with association President Mr. Sukhdev Raj to explain the various activities of the project and create awareness about the project among local service providers and understand the challenges of the cluster. We have received a positive response from the association president for supporting all our activities to promote energy efficiency and renewable energy in the cluster.

### **2. Awareness & Visits to Hand Tool Units**

We have visited other hand tool units in Jalandhar for creating awareness regarding the project and explained the support needed form them during the cluster, we have also collected local service provider data from the units. During this period, we have visited different hand tool units and tried to understand their present need based on existing technology and demand supply pattern.

### **3. Questionnaire**

We had developed a questionnaire to collect basic information of local service providers in the cluster. These filled data collection forms are attached in annexure 1 and detailed list of LSP is attached in annexure 3. We also had one to one interaction with these local service providers.

## 5 OUTCOME OF LSP MAPPING

Comprehensive LSP data was collected through meeting with service providers and through various interaction during stakeholder workshops. The survey helped in analyzing various aspects of LSPs like:

- Existing skill sets
- Employee Strength
- Years of service
- Areas in which LSP need training

### Geographic Location

Figure 6: Geographical Location of LSPs

Most of the LSP's catering to Jalandhar hand tool units are located in Jalandhar and nearby area like Phagwara, Ludhiana, Hoshiarpur. For the major energy consuming equipment's like Furnace, air compressor, hammers etc. plants are directly depending upon on OEM's which are spread across the country.

### Skill Set

In Jalandhar Cluster, the skill set of employees on existing technologies and operations is on lower side (73%). This is mainly due to fact that most of the LSP' are small in size. Also, during the field survey to hand tool units, almost all the maintenance related activities in the plant are carried out by diploma and hands on experience people. Only about 19% fall in medium category which includes few motor rewinders, mechanical repair and maintenance operators mainly for utilities.

Figure 7: Skill Set of LSP's

### Employee Strength

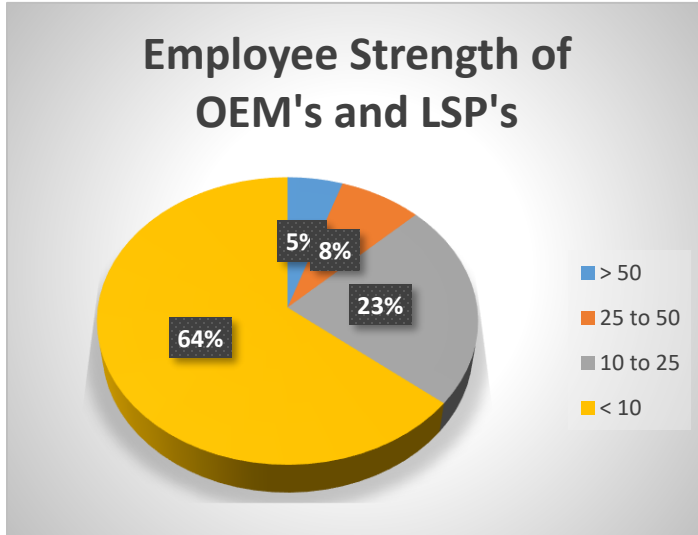

Figure 8: Employee Strength of OEM's & LSP's

The graph clearly indicates that majority of the LSP's are small players with average number of employee's strength less than 10 people. Smaller LPSs include local motor service people, fabricators, local dealers etc. The role of OEMs in the cluster is also significant as all the major critical equipment's for process as well as for utilities are supplied directly by OEMs.

**Educational Qualification**

Most of the stakeholders who participated in the survey fall in hands on experience without any educational background. Local service providers and hand tool units in the cluster have a mix of graduates, diploma holders and uneducated having practical hands on experience. Even though the education level is on lower side and they are well versed in their day to day operations, the survey helped in identifying various gap towards advancements in latest EE/RE technologies.

Figure 9: Educational Level

Technology wise mapping of LSPs identified in the cluster is given below: -

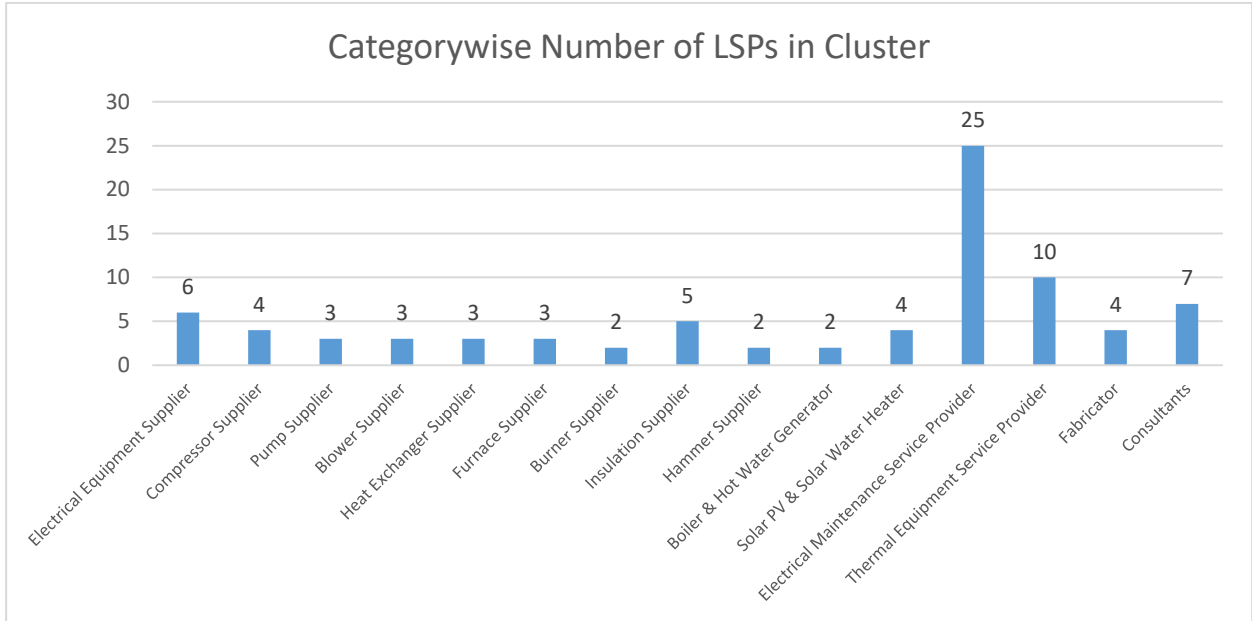

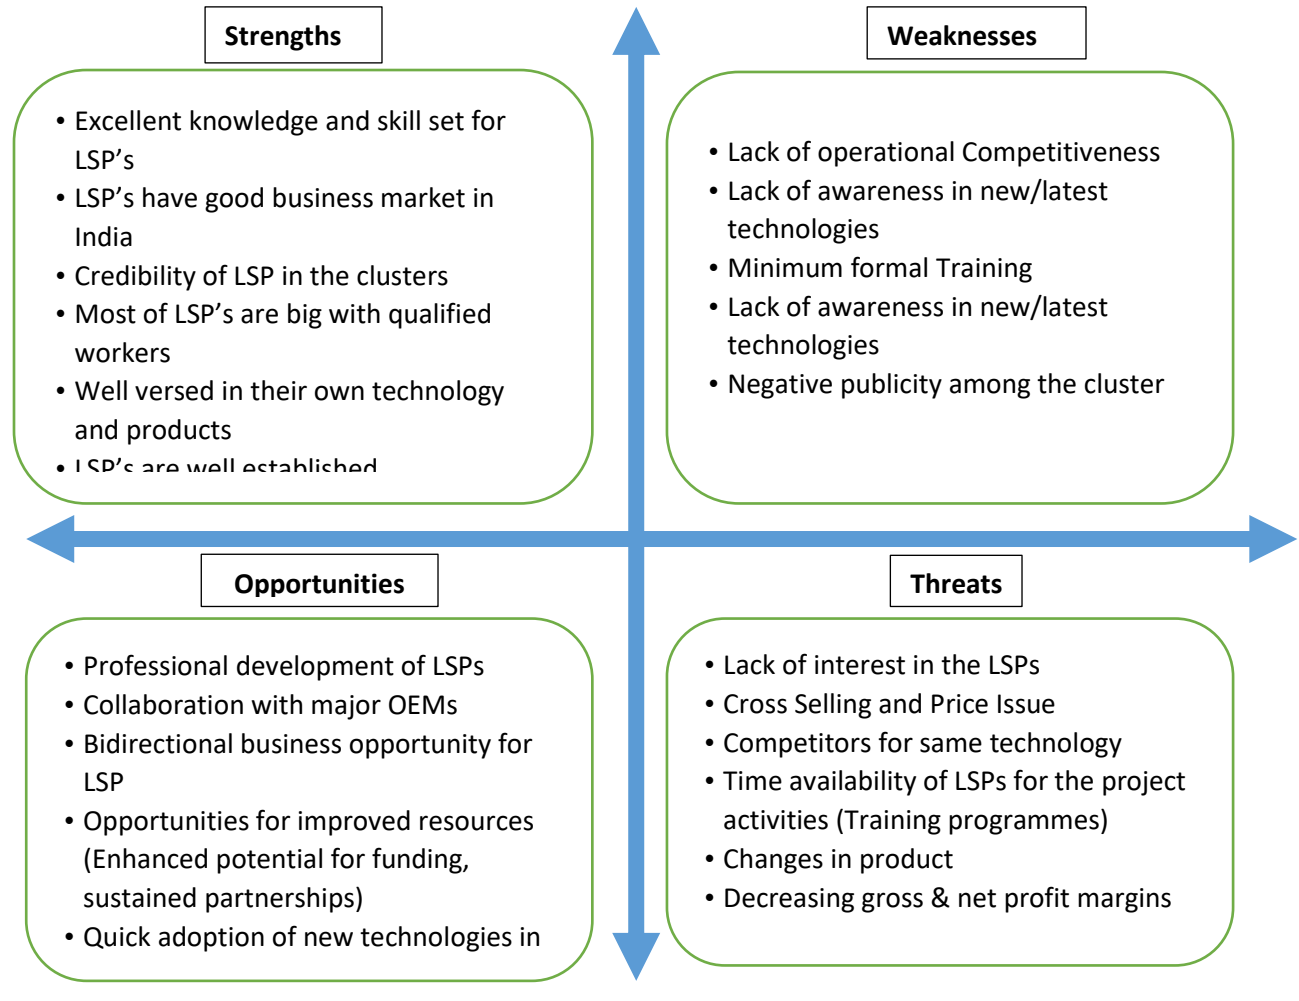

Figure 10: Categorifies Number of LSPs

Based on the LSP data, strength and weakness of service providers were analyzed and also what are the opportunities and threats for them in the cluster were identified during the mapping process SWOT analysis was also done based on the demand supply need of the services in the cluster

## 6 ANNEXURES

### 6.1 Annexure 1 - LSP Data collection format

LSP Data Collection Format for Jalandhar Hand Tool Cluster	
Name of the Local Service Provider	BAJAJ ELECTRICAL INDUSTRIES
Address	
Contact Person Name	
Designation	
Mobile No	9910117487
Mail ID	bajajelectricalindustries@gmail.com
No of years in existence	36 Years
Technology/ Service Provided	Industrial. Transformers, Circuit Breakers
Major OEM's/ Supplier dealing with	Crompton, ABB, Schneider, ITC
Areas/Locations Served or covered	All over India
Name of the Hand Tool Units served by the LSP	Jansons, Malabar, Ajay Industries
No of Employees currently working	2

Existing Skill set of the employee and gaps	B.Tech (Aerospace Engg.)
Main Competitors providing same technology	—
Organisational Strength and Weakness	Quality Products, Excellent Services
Support Needed if any (in terms of technology, skill development etc)	Skill labour Need avenues on energy efficiency in Transformers & Circuit Breakers.

For Bajaj Electrical Industries  
  
 Authorised Signatory

LSP Data Collection Format for Jalandhar Hand Tool Cluster	
Name of the Local Service Provider	Bhatia Electric Stores Pvt. Ltd.
Address	Adla Hoshiarpur, Electrical Market Jalandhar
Contact Person Name	Gurmeet Pal Singh Bhatia
Designation	Director
Mobile No	9803120000
Mail ID	gurmeet@bhatiaelectric.com
No of years in existence	40 years
Technology/ Service Provided	All Electrical equipments especially Motors & Lightings.
Major OEM's/ Supplier dealing with	Havells / Siemens India Ltd.
Areas/Locations Served or covered	All areas around Jalandhar
Name of the Hand Tool Units served by the LSP	All Major Units around Chandigarh, Jalandhar H.R. International, Victor Forging, Ushel
No of Employees currently working	16

Existing Skill set of the employee and gaps	Need to identify by the project team during training.
Main Competitors providing same technology	National Agencies / Goodwill E-lectro Control
Organisational Strength and Weakness	Our Motto Customer Satisfaction is our profit.
Support Needed if any (in terms of technology, skill development etc)	For more energy efficient products knowledge.

 A handwritten signature and a circular stamp. The signature appears to be 'A. S. N. Q. U.' and the stamp contains some illegible text and a date.

LSP Data Collection Format for Jalandhar Hand Tool Cluster	
Name of the Local Service Provider	Kumha Sons
Address	Adda Hoshiarpur Electric Market Jalandhar.
Contact Person Name	Mr. Vaibhav
Designation	9978083181
Mobile No	Director
Mail ID	kumha vaibhav@yahoo.in
No of years in existence	23 years
Technology/ Service Provided	All electrical goods/items
Major OEM's/ Supplier dealing with	L&T, Phillips
Areas/Locations Served or covered	All across Jalandhar Industries
Name of the Hand Tool Units served by the LSP	Ajay Industry, Victor Forging HK International, Paxima, Telbro, OK
No of Employees currently working	4 NOS

Existing Skill set of the employee and gaps	B.com
Main Competitors providing same technology	All electrical good Suppliers
Organisational Strength and Weakness	All industrial electrical items
Support Needed if any (in terms of technology, skill development etc)	Need awareness on LED lighting & Motor efficiency

For KUMRA SONS  
Partner

LSP Data Collection Format for Jalandhar Hand Tool Cluster	
Name of the Local Service Provider	Mk. Choudhary Steel Traders
Address	Sodal Road, o/p/s Sodal Mandir, Jalandhar City (Ph)
Contact Person Name	Amrinder Singh
Designation	Partner
Mobile No	98144 62624
Mail ID	amrinder.singh@jalco.co.in
No of years in existence	17 years
Technology/ Service Provided	
Major OEM's/ Supplier dealing with	
Areas/Locations Served or covered	Jalandhar, Amritsar, Ludhiana, Mandi Gobindgarh
Name of the Hand Tool Units served by the LSP	H.R. Internationals Vijay Cycle + Steel Inds Proxima Steel Forgings, ACME Forgings
No of Employees currently working	

Existing Skill set of the employee and gaps	Graduate
Main Competitors providing same technology	—
Organisational Strength and Weakness	—
Support Needed if any (in terms of technology, skill development etc)	Ready to have any kind of Support.

For Choudhary Steel Traders

Partner

LSP Data Collection Format for Jalandhar Hand Tool Cluster	
Name of the Local Service Provider	Bhogal Electrical Industries.
Address	Chotta Saipur Road Near G.T. Road Jalandhar City.
Contact Person Name	Mr. Gurdial Singh Bhogal
Designation	
Mobile No	98148-22946
Mail ID	bhogalgs@gnail.com
No of years in existence	38 years.
Technology/ Service Provided	Industrial Gears
Major OEM's/ Supplier dealing with	
Areas/Locations Served or covered	Jalandhar & within Punjab
Name of the Hand Tool Units served by the LSP	Ajay Industries, Gardner, Asian exports
No of Employees currently working	9

Existing Skill set of the employee and gaps	Machinist, Turner, Milling Man, Shaper man
Main Competitors providing same technology	
Organisational Strength and Weakness	All types of Brass Manufacturing
Support Needed if any (in terms of technology, skill development etc)	Skilled Manpower Awareness of Energy Conservation

For Bhogal Electrical Industries  
Gudhik Prop

LSP Data Collection Format for Jalandhar Hand Tool Cluster	
Name of the Local Service Provider	SS MECHANICAL WORKS
Address	KISHAN PURA CHOWK, NEAR Kamal HOSPITAL Jalandhar
Contact Person Name	M. Surinder Singh
Designation	
Mobile No	98150-21667
Mail ID	ssmechgear@gmail.com
No of years in existence	29 years
Technology/ Service Provided	Gear Manufacturing
Major OEM's/ Supplier dealing with	-
Areas/Locations Served or covered	Jalandhar, Jammu, Himachal.
Name of the Hand Tool Units served by the LSP	Ajay Industries
No of Employees currently working	23

Existing Skill set of the employee and gaps	ITI, Machinist, Turner, Randaman Hobbing Man, Drill Man.
Main Competitors providing same technology	-
Organisational Strength and Weakness	Manufacturing of all types gears.
Support Needed If any (in terms of technology, skill development etc)	Need low cost electricity. Need awareness on motor efficiency

For S.S. MECHANICAL WORKS

  
Prop.

LSP Data Collection Format for Jalandhar Hand Tool Cluster	
Name of the Local Service Provider	M/s Sidhu Engineering Works
Address	67, Sadal Road Jalandhar
Contact Person Name	Mr Vijay Kumar
Designation	Proprietor
Mobile No	9417286659
Mail ID	sidhuvengswalks@gmail.com
No of years in existence	50+
Technology/ Service Provided	Dies 9 Moulds
Major OEM's/ Supplier dealing with	Footwear Industry
Areas/Locations Served or covered	All over India
Name of the Hand Tool Units served by the LSP	
No of Employees currently working	10

Existing Skill set of the employee and gaps	ITI & Diploma holders
Main Competitors providing same technology	
Organisational Strength and Weakness	
Support Needed if any (in terms of technology, skill development etc)	

For Sidhu Engineering Works.
